Chemical Chaos Birthday Party

\$295

As if party planning wasn't chaotic enough, why not add a little more with the Center's help. This package includes an assortment of color-changing, fizzing, and all-around exciting chemistry experiments that will be sure to get a reaction out of your guests. Our scientist will then demonstrate some of the crazy characteristics of certain chemicals - creating instant smoke, making a giant foamy fountain, and even growing an extra hand to help clean everything up. Finally, we will unlock the secrets of color-changing chemistry with your own private fireworks² demonstration.

SuperCoolness Birthday Party

\$325

Throw the COOLEst birthday party ever. Guests play with dry ice - one of the coldest substances on Earth. Your party will get three times COOLER when we break out the LIQUID NITROGEN. Our energetic educator will pull out all the stops and show off one of the coldest chemicals in the known universe. The best part about this Super Cool Birthday Party - fresh, hand-made LIQUID NITROGEN ICE CREAM,³ of course!

Additional Information

1. Each package includes safety equipment and supplies for up to 20 guests who will be participating in the hands-on experiments. Additional guests may be added for \$15.00 per person. Adult participants are not counted in this number.
2. Da Vinci Science Center will provide necessary fire suppression materials - fire blanket and extinguisher - to conduct this experiment safely. No explosives will be used in this demonstration and it is safe to perform indoors.
3. Da Vinci Science Center is not responsible for any dietary restrictions. Our ice cream recipe includes half-and-half, whole milk, vanilla, and sugar. No toppings nor additional ingredients can be added prior to service or distribution; however, feel free to provide your own toppings. Ice cream will be provided to all attendees. A guest count must be confirmed at least one week before the party.
