\*\*Membership must still be active through the dates of the camp

**All sessions held at March Elementary School for grades 1-4**

## Super Spies

\$295, July 8-12

Your mission: become the best super spy in the world! Unlock your true potential as you practice picking real locks and cracking complex safe codes. Experiment with the latest high-tech gadgets and modern methods for uncovering the truth as you solve this year's Super Secret Spy Challenge Course. We'll cap off our week-long mission with some field work Friday at the Da Vinci Science Center in Allentown.

## Amusement Park Physics

\$335 (\*\$295) July 15-19

Discover the physics behind the fun. Investigate the ups and downs of Newton's Three Laws of Motion, design a roller coaster, and build devices to measure the forces of amusement park rides. Spend a day at Dorney Park testing several of its world-class rides and coasters, and a day at the Da Vinci Science Center exploring our own collection of devices and machines.

\*If you have or plan to purchase a Dorney Park Season Pass, please select the \$295 no ticket option.

## Programming and Video Game Making

\$295, July 22-26

Using Scratch - an icon-based computer language made for kids - we'll learn the basics of coding and programming as we make our own apps and video games. Whether you are a new computer user or have been playing for years, everyone is sure to have a great time developing this 21st century skill. Educators will challenge each camper based upon her/his ability and provide individualized guidance to help them advance. We'll spend the week working with computers, tablets, robotics, and several "unplugged" activities to add variety and complexity to our days. As a bonus on Friday, campers will travel to the Da Vinci Science Center in Allentown to explore the exhibits and technology.

## Wizard World

\$295 July 29-Aug. 2

Discover the science behind the magic from your favorite School for Witchcraft and Wizardry. Together, we'll explore subjects like herbology, potions, astronomy, and care of magical creatures. Campers will make new friends as they earn "STEM Points" for their houses and compete in a Tri-Wizard Challenge. Everyone is invited to wear his or her best wizard attire. This week ends with a trip to the Da Vinci Science Center in Allentown on Friday to complete a wizard scavenger hunt and explore the exhibits.
